- To provide meaningful results and to protect the privacy of individual students, data are printed only when the total number of students in a group is at least 10 and when the performance of individuals is not disclosed. A dash (–) appears when data are suppressed.
- Percentages are rounded to the nearest whole number.

- Achievement Levels 3-5 are grouped together for comparison, since the percentage of students scoring at or above grade level is necessary for federal AYP reporting.
- Content area results are not intended for comparison across administrations.
- FCAT 2.0 scores were adjusted so that student performance can be expressed on the FCAT Equivalent scale.
