Infrastructure Trial Overview

The Infrastructure Trial is an opportunity for districts and schools to prepare for the operational computer-based test administrations by simulating test-day network utilization, determining any school or district issues, and confirming that all workstations and devices that will be used for testing can run the appropriate software.

Please note the following important information about the Infrastructure Trial:

- Schools will prepare by reading the applicable guides and manuals.
- Districts may create an environment that matches expected school bandwidth utilization that will be used during testing.
- Schools may create the same testing environment (e.g., testing rooms, number of computers/devices, appropriate switches and hubs, power supplies) that will be used for testing.
- Schools will use the web-based Diagnostic Readiness Tool provided by AIR to determine network user capacity and bandwidth requirements.
- Prior to the largest computer-based administration of the year, or as directed by the district, schools will run a trial which simulates the appropriate number of student logins based on the total number of computers that they intend to use concurrently for testing.
- The Trial should take approximately thirty minutes. During this time users will log in, supply random answers, and submit the test.
- Schools are encouraged to run the Trial in their testing rooms on their testing workstations/devices and troubleshoot any local issues prior to a district-wide Infrastructure Trial.

The Infrastructure Trial should only be used to test the school and district infrastructure; the content used for the Infrastructure Trial is **not appropriate for student practice**. In order to create a Trial that is slightly larger than the tests used by Florida, items from Florida's practice tests are repeated throughout the Infrastructure Trial. Content-specific practice tests are available for students at <http://www.FSAssessments.org/students-and-families/practice-tests/>. The Practice Tests are intended to familiarize students with the types of items that will make up the tests and with the tools that will be available to them in AIR's Test Delivery System (TDS).

Infrastructure Trial Guide Overview

The purpose of this guide is to provide district and school assessment and technology personnel with necessary information and instructions to administer the FSA Infrastructure Trial. This guide will define important terms, walk you through tasks required before, during, and after a Trial, and familiarize you with the Test Administrator (TA) Interface and TDS. It is recommended that you read through the entire guide before starting the Infrastructure Trial Test.

The major topics covered in this guide are:

- **Contacting the FSA Help Desk:** This section provides instructions and information on contacting the FSA Help Desk with questions or technical issues.
- **Using the Web-Based Diagnostic Readiness Tool:** This section provides instructions for using the Diagnostic Readiness Tool.
- **Running the Infrastructure Trial Test:** This section provides the instructions for the TA Interface, Student Interface, and Infrastructure Trial Test.
- **Follow-Up:** The final section will include instructions for providing the district and AIR with feedback regarding your Infrastructure Trial.

Glossary of Important Terms

Diagnostic Readiness Tool: The web-based tool that performs a system check to assess the readiness of a particular computer/device for testing.

FSA Portal: Resources and information for district and school personnel are located in the FSA Portal, which is accessed at www.FSAssessments.org. The portal also includes links to TDS, the Test Information Distribution Engine (TIDE), and the FSA Reporting System.

FSA Reporting System: The FSA Reporting System will deliver state, district and school score results to authorized users at the end of an administration. To access the system, visit the FSA Portal.

Secure Browser: The secure browser allows students to access the computer-based FSA assessments. This software must be installed on all computers or devices that will be used for student testing. A link to download the secure browser is located in the FSA Portal.

Session ID: Session IDs are unique codes generated by the TA Interface. In addition to their username and password, students use the Session ID to log into operational computer-based FSA assessments. Test Administrators must record the Session ID as part of their required administration information.

TDS: The Test Delivery System is comprised of two systems: The TA Interface, used to create and manage test sessions, and the Student Interface (the secure browser), used to access the testing site.

TIDE: The Test Information Distribution Engine (TIDE) supports the registration or preidentification of students for assessments, managing users for FSA systems, managing orders for testing materials, distributing voice packs, and tracking test participation.

Contacting the FSA Help Desk

If technical assistance is needed at any point during your Infrastructure Trial, contact the FSA Help Desk at 866-815-7246 or fsahelpdesk@air.org.

Make sure that you know the answers to all relevant questions below so that AIR can assist you effectively and efficiently:

- Are you using a Windows, Mac, or mobile device?
- What is your role (district assessment coordinator, district technology coordinator, school assessment coordinator, school technology coordinator, or test administrator)?
- What task were you trying to complete when you encountered an error?
- What was the error message? If there wasn't an error message, what are you unable to do? If there was an error message, did an error code appear?
- Is the student using a Windows, Mac, or mobile device?
- What step of the Infrastructure Trial Test was the student/volunteer trying to complete when he/she encountered an error?
- Did an error code or message appear?

Using the Web-Based Diagnostic Readiness Tool

The web-based Diagnostic Readiness Tool performs a system check to assess the readiness of a particular computer for testing. One of the checks is a download and upload speed analysis that includes an estimate of the number of simultaneous students who can test at the same location. The Diagnostic Readiness Tool uses a sophisticated statistical model of the testing process that replicates variation in instantaneous demand (e.g., the number of students who simultaneously press the Next button) and evaluates the likelihood that peaks will exceed network free capacity (network capacity not used by other processes) with a frequency likely to cause noticeable delays in testing.

To access the Diagnostics Readiness Tool, follow these steps:

1. From the Student Sign In page (on the secure browser or at <https://flpt.tds.airast.org/student>) select the **Run Diagnostics** link.

Florida Standards Assessments Practice Tests

The purpose of the practice tests is to enable users to become familiar with the functionality and item types that students will encounter in AIR's Test Delivery System; the tests are not intended to guide classroom instruction. For more information about taking the practice tests, please access the *Training Test User Guide* at www.FSAssessments.org.

Login information is not required for the Practice Tests. Click Sign In to access the Practice Test as a Guest.

- The Diagnostic Readiness Tool asks the user to indicate the number of students that they expect to simultaneously test, and the system will test the bandwidth and calculate the peak simultaneous loads given the desired number of testers.

The screenshot shows a web interface titled "Student Testing Site". It contains a text box with instructions: "This page allows you to check the **current** bandwidth of your network. Select a test from the drop-down list and enter the maximum number of students likely to test at one time, then click [Run Network Diagnostics Tests].". Below this, system information is displayed: "Your Operating System: **Windows 7**", "Your Browser Version: **Chrome v50**", and "Secure Browser: **false**". Under "Network Diagnostics:", there is a "Select Test:" dropdown menu with "Select Test" selected, and a text input field for "Enter the total number of students you would like to test at one time:". A "Run Network Diagnostics Tests" button is positioned below the input field. At the bottom of the main content area, there are two buttons: "Return to Login" and "TTS Check". In the bottom right corner, the text "American Institutes for Research" is visible, along with the address "1000 Thomas Jefferson Street, NW Washington, D.C. 20007".

- After the Diagnostic Readiness Tool runs, the system reports back confirmation that bandwidth is adequate (as seen below), or suggests a likely maximum number of students supported.

The screenshot displays the results of the network diagnostic tool. It is divided into two columns: "Download Results:" showing "15.038 Mbps download." and "Upload Results:" showing "0.509 Mbps upload.". Below these is a section titled "Bandwidth Summary:" which contains a green-bordered box with the following text: "Given the current load on your system, you should be able to test the requested number of students at this location. (Please note: The throughput estimates include the encryption/decryption overhead for data transfer. Throughput estimates change as the network conditions change and can vary each time you run this tool)".

- Work with your district technology coordinator to ensure you can test the appropriate number of students for each administration.

Running the Infrastructure Trial Test

Download and Install the Secure Browser

Visit the **Secure Browser** page on the FSA Portal to download the latest version of the secure browser and the *Secure Browser Installation Manual*. Install the secure browser on each computer or device to be used for the Infrastructure Trial.

Session Management

This section provides all the necessary information and steps for setting up sessions in the TA Interface for the Infrastructure Trial. For more detailed information on the TA Interface, see the *Test Administrator User Guide*, available on the portal.

Creating a Test Session

Accessing the TA Training Site

1. Select the **Test Administration** card on the portal.

FSA Portal Card

2. Select **TA Training Site**.

You will be directed to the TA Training Site landing page.

3. Select **TA Training Site**.

You will be directed to the login screen. Enter your email address and password into the respective text fields.

4. Select **Secure Login**. You will be directed to the TA Training Site.

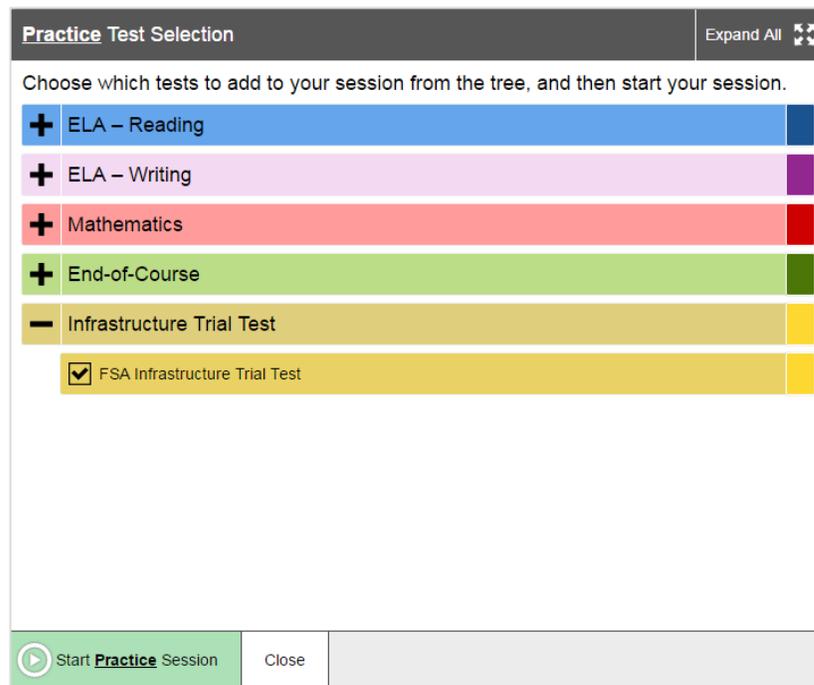

Portal Card for TA Training Site

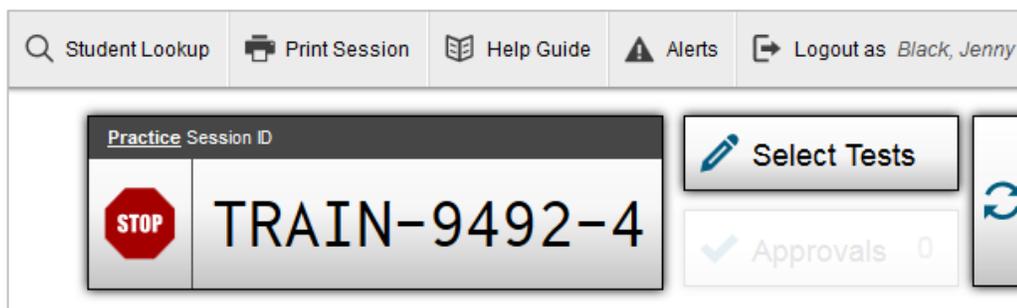

Starting a Session

The session must be started before guest students are able to log in to the TDS Student Interface for the Infrastructure Trial Test.

1. In the TA Training Site, the **Test Selection** window opens automatically when you log in.
2. Select the checkbox next to the **FSA Infrastructure Trial Test** to include it in the test session.
 - a. Once you have selected the test, the **Start Practice Session** button will become active.

3. Select the **Start Practice Session** button.
 - o The **Test Selection** window closes.
 - o The Session ID will generate and appear next to the **Stop** button.

4. Provide the Session ID to the users who will log in to your test session. Display this Session ID in a location where it is visible to users. For example, write the Session ID on the board. **Users must enter the Session ID exactly as it appears on the TA Training Site.**

Starting the Infrastructure Trial Test

1. Before students arrive, ensure that the testing room is prepared as it will be on the day of the test.
2. Ensure that each student/volunteer has a pen or pencil.
3. Ensure that all software applications, including Internet browsers, are closed on all student computers or devices before the trial begins.

Logging in as Guest Users

Because the purpose of an Infrastructure Trial is to test district and school infrastructure, it is not necessary to use real student data. Users will log in to the TDS Student Interface as Guest Users.

Script for the Infrastructure Trial

Note: The Infrastructure Trial is **not** to be used for student practice. The Infrastructure Trial uses mock content to allow districts and schools to simulate a computer-based administration for testing hardware and network connectivity prior to the operational administration.

Each user should be provided a pen or pencil and should log any issues on a sheet of paper.

SAY	Thank you for participating in the Infrastructure Trial. If you encounter any problems during the Infrastructure Trial, please describe the problem and record the number of times it occurred on your sheet of paper. If the problem prohibits you from proceeding with the test, please raise your hand and someone will assist you. Are there any questions?
------------	---

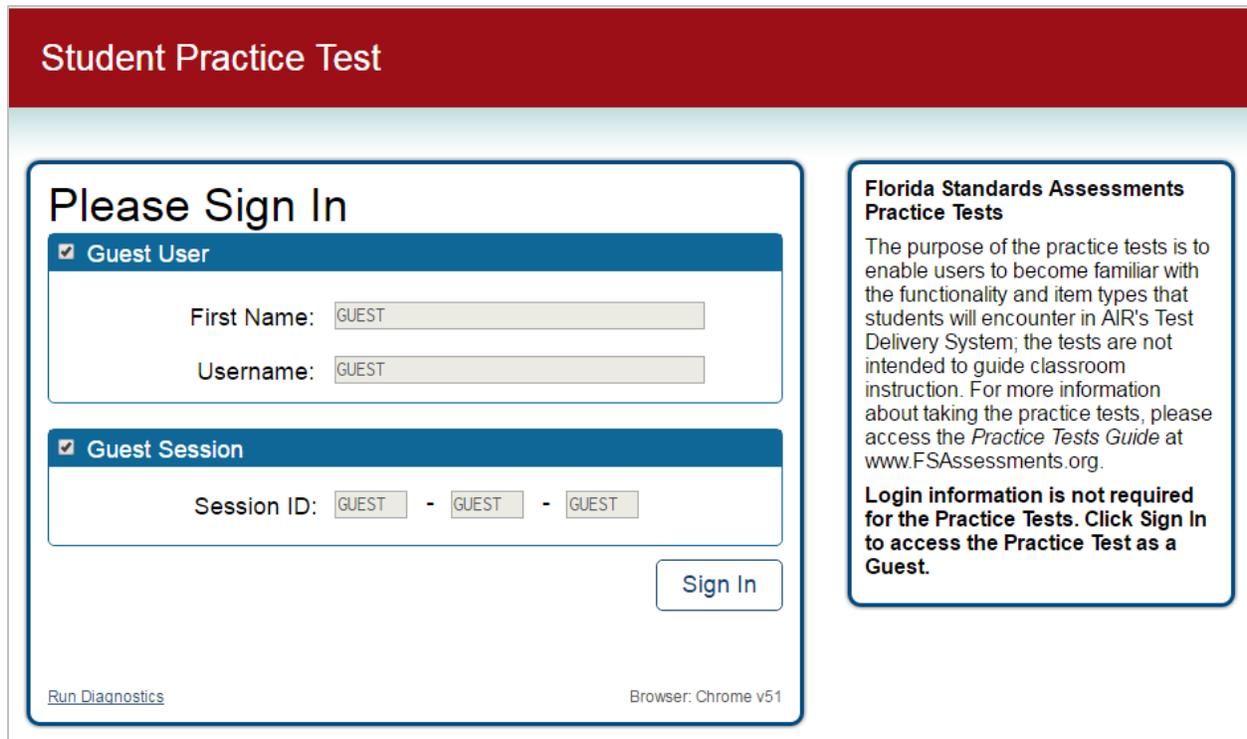

If students are used to conduct the Trial, please say the following:

SAY	<p>Please remember that the Infrastructure Trial is only for the purpose of testing our school's systems for online testing. It is not meant to introduce you to the test items or to be used for practice.</p> <p>Practice Tests are provided to introduce you to the tools and the format of the computer-based test questions. After testing today, I will provide you with a web address you can use to access the practice tests.</p>
------------	--

Answer any questions.

SAY	<p>Launch the FSA Secure Browser icon on your desktop or mobile device. Click Go to the Practice Test Site to access the Student Practice Test site. A Sign In screen should be displayed. Raise your hand if you do not see the Sign In screen.</p>
------------	---

Assist users as needed and make sure everyone is able to get to the Student Practice Test Sign In page, as shown below.

SAY	<p>Uncheck the Guest Session check box, enter the Session ID, and select the Sign In button.</p> <p>The Is This You? screen will appear. Select any grade level and select the Yes button.</p> <p>The Your Tests screen will appear. Select the arrow to start the FSA Infrastructure Trial Test. Raise your hand if you are having trouble with any of these steps.</p>
------------	--

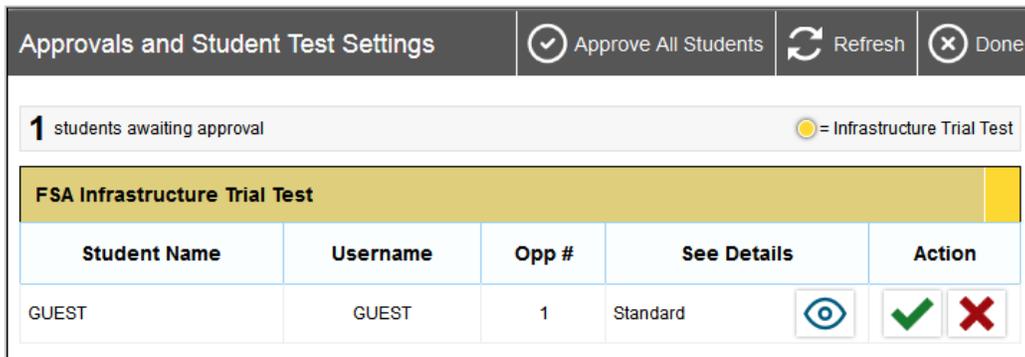

Assist users as needed and make sure everyone has proceeded to the **Waiting for TA Approval** screen.

SAY	<p>The TA will now approve your test session.</p>
------------	---

To approve users in the TA Interface, first select the ✓ **Approvals** button on the right side of the screen; this will open the separate **Approval** screen. A list of all users waiting for approval will appear.

- If you wish to view or modify a student's test settings before approving the student to test, click the test settings icon [] in the See Details column. The **Test Settings** window appears. In this window, you can assign students accommodations, such as Text-to-Speech and Masking. After assigning accommodations, click **Set** at the top of the window.
- *To approve individual users*, select the green checkmark button [] for each student. The student will be approved.
- *To approve all users currently displayed in the list*, select the ✓ **Approve All Students** button at the top right of the test table. All users listed will be approved. However, please note that if you use this option, any users who reach the **Waiting for TA Approval** screen after you have selected ✓ **Approve All Students** will need to be approved separately.

A sample **Approval** screen can be seen below.

SAY	<p>The <i>Is This Your Test?</i> screen will appear.</p> <p>Select the Yes, Start My Test button.</p> <p>On the <i>Sound Check</i> screen, click the sound icon [Yes.</p> <p>If Text-to-Speech was assigned, on the <i>Text-to-Speech</i> screen, click the green speaker button to make sure you can hear the voice. Then select Yes, I heard the voice.</p> <p>Scroll to the bottom of the <i>Test Instructions and Help</i> screen. Select the Begin Test Now button.</p> <p>Now that the Infrastructure Trial Test has loaded, take about 10 seconds on each item before proceeding to the next question by selecting the forward arrow at the top of the screen. Your answers do not need to be correct; just mark a random answer and move on.</p> <p>For the purposes of this Trial, do not pay attention to the content of the questions. During the course of the Infrastructure Trial, take some time to use each tool. These include the Tutorials, Mark for Review, Calculator, Highlighter, Zoom, Speak Question, Masking, and Line Reader tools, as available. Does anyone have any questions about how to use the tools or how to navigate between questions?</p> <p>You will proceed to the second session of the trial by clicking Next on the first <i>Review</i> Screen and clicking Yes on the pop-up. After you reach the last question of the test, select the End Test button on the <i>Review</i> Screen. Use your sheet of paper to record any additional comments about your experience.</p> <p>Now begin working.</p>
------------	---

Walk around the room and assist users as needed in order to complete the Infrastructure Trial.

SAY	<p>When you have completed the Infrastructure Trial, select End Test on the <i>Review</i> Screen and Yes on the pop-up. Then select Submit Test, confirm that you want to leave the test, then select Log Out.</p>
------------	---

When everyone in the session has completed the Trial, stop the session in the TA Training Site.

Stopping a Session

To stop the test session:

1. Select the **Stop** button in the upper-right corner of the screen. An ***Important!*** box will appear, requesting verification that you want to end the session and log students out.
2. Select **OK** to continue. The test session will be closed.

Follow-Up

If students were used for the Trial and they are interested in accessing practice tests, direct them to <http://www.FSAssessments.org/students-and-families/practice-tests/>.

Once your Infrastructure Trial has been completed, the computer-based testing team at your school should review all notes from the Infrastructure Trial. Follow up with the FSA Help Desk on any specific technology issues. The school should also share these notes with the district computer-based testing team. The district may also request additional confirmation that the trial has been completed successfully. Please report any additional issues or concerns to your district assessment coordinator.
