

Stanford Achievement Test - Tenth Edition (SAT-10)

Grades/Students

All grades K-2

Date

The assessment is administered in April of each school year.

Description

The SAT-10 is a standardized, norm-referenced achievement test that utilizes a multiple choice format. Students are administered the Reading Comprehension and Mathematics: Problem Solving subtests. The SAT provides achievement data that can be used to compare local students' performance with the performance of students in the nation. The SAT also provides an opportunity for early universal screening to identify students eligible for the gifted program.

Results

In June, schools receive students' stanine and percentile rank scores for each subtest, and school wide summary data, including median percentile ranks and quartile score. Parents receive Individual Student Report (ISR), which provide their child's percentile rank score on each subtest.
