

College Board SAT® Results for the Graduating Class of 2019

The College Board provides districts with results for the SAT and the SAT Subject Tests on an annual basis for the current graduating class. The report which follows summarizes the SAT results in the Miami-Dade County Public Schools for the graduating class of 2019. The College Board made content, format, and scoring changes to the SAT in 2016. The redesigned SAT test prioritizes content that reflects the kind of reading and mathematics content that students will encounter in college and their future work lives. It was first administered in the spring of 2016. This report presents data on students in the graduating class of 2019 who took the redesigned SAT at any time during the 2016-2017, 2017-2018, or 2018-2019 academic years.

Nationally, more than 2.2 million graduating seniors in the class of 2019 took the redesigned SAT, with over 190,000 participating in Florida. In Miami-Dade County Public Schools (M-DCPS), 22,236 students participated in the SAT, representing 84% of the District's class of 2019.

Highlights of the results include the following:

- The percentage of M-DCPS' graduating seniors participating in the redesigned SAT increased from 78% in 2018 to 84% in 2019.
- M-DCPS 2019 graduates' mean SAT scores in both Mathematics and Evidence-Based Reading and Writing were higher than the concordant scores required to meet the high school graduation test requirements.
- M-DCPS students' mean Evidence-Based Reading and Writing scores were as high as or higher than statewide averages in 44% of senior high schools and Mathematics scores were higher in 40% of schools.
- M-DCPS students' mean scores in 35% of M-DCPS senior high schools were as high as or higher than the national average in Evidence-Based Reading and Writing. Mean scores in Mathematics were as high as or higher than the national average in 20% of M-DCPS senior high schools.

It should be noted that the population tested consists of self-selected students who participate on a voluntary basis, as with all college entrance exams. As a result, student demographic characteristics and the number and percentage of students tested may vary greatly among districts and schools and from year to year. Therefore, caution should be used in making comparisons, particularly in schools with relatively low numbers of students tested.

The SAT mean scores for graduating classes of 2018 and 2019 in Evidence-Based Reading and Writing and Mathematics, are presented in Table 1 for the District, the state, and the nation.

Individual school SAT results for the Class of 2019 are presented in Table 2, which displays the number of test-takers at each school, as well as the mean scores for each

subject area test and the accompanying Composite score. School summary score results are not presented if fewer than 10 students participated; however, the data for these schools are included in the District and state results.

Additional information on national and state results on the 2019 SAT may be found on the College Board's website at: <https://reports.collegeboard.org>.
